

Purpose of using Agile development

Saturday, December 16, 2023

4:34 PM

Agility is a buzzword when describing a modern software process
Agility is the ability to respond to changes

The reason we use agile development is because we can change costs.

We can make a cost curve.

Philosophy + Set of guidelines

Encourages customer satisfaction and early / incremental delivery of software

1. Satisfy the customer early through continuous delivery of valuable software
2. Welcome changing requirements -- even late in development
3. Deliver working software frequently
4. Business people and developers must work together daily throughout the project
5. Give the devs the environment and support they need -- trust them to get the job done
6. Face-face conversation is the best method of communication
7. Working software is the main measure of progress
